

ALLIANT SYSTEMS INITIATED INTO THE MSCA (Mechanical Service Contractors of America) GreenStar PROGRAM

In August 2010, Alliant Systems became the 33rd contractor in the country and the only contractor in the Pacific Northwest to gain entry into the MSCA GreenStar Program.

MSCA STAR qualified contractors are more than just committed to excellence. They're continually devoted to environmental stewardship. MSCA GreenStar is an exclusive designation available only to contractors who have clearly demonstrated environmental responsibility by meeting specific and arduous criteria.

Recognized by the HVAC industry's top green building resource, the United States Green Building Council (USGBC), MSCA GreenStar was developed to advocate MSCA STAR leadership in sustainable mechanical service.
